WHO AM I?

After graduating my PhD studies in Astrophysics I became a web developer. As an intern in Solarwinds I have learnt many new things. I have started as a content developer and I have worked my way up as a web developer in Wordpress, creating new blocks and components. I am familiar with Jira and Confluence and for collaboration with colleagues I am used to work in GitHub and Bitbucket. Each day I am keen to learn new things and recently I have started learning React. Last few months I have been working in Papirfly on two positions, as a Template Developer (using company's own framework, TypeScript) and as a Frontend Developer creating banners (HTML, SASS, JavaScript).

EXPERIENCE

2023	Junior Frontend Developer	Papirfly
	TypeScript / HTML / SASS / Bitbucket / Template Development / npm / Jira / FogBugz / After Effect / Adobe Illustrator	
2022 - 2023	Web Developer	Solarwinds
	HTML / CSS / SASS / Javascript / Adobe Target / Jira / Sitecore / Wordpress / Github / php / Docker / npm	
2010 - 2021	Research Scientist	Masaryk University
	spectral analysis / Fortran / Genetic Algorithm / Pikaia / Gnuplot / Python	
2015 - 2021	Maternity and Family Leave	home
	children	
2010 - 2015	PhD Student	Academy of Science in Ondřejov
	computer modeling of the Be stars / Fortran / genetic algorithms / python	

EDUCATION

2010 - 2021	Doctoral Degree	Theoretical Physics and Astrophysics, Masaryk University
	Dynamical Evolution of Be stars disks	
2007 - 2010	Master's Degree	Theoretical Physics and Astrophysics, Masaryk University
	Shell modelling of the Be stars	
2004 - 2007	Bachelor's Degree	Theoretical Physics and Astrophysics, Masaryk University
	Modelling of time behaviour of shell around the Be star 60 Cyg	
fall 2009	fall semester through EEA and Norwegian grants	Universitetet i Oslo

LANGUAGES

Czech - native
English - proficient
French - rudimentary
Norwegian (Bokmål) - rudimentary

HOBBIES

I love astronomy, programming, art, hiking, climbing, IronMan, baking bread and much more
